

Template Week 5 – Operating Systems

Student number:574642

Assignment 5.1: Unix-like

a) Find out what the difference is between UNIX and unix-like operating systems?

Echte UNIX systemen slagen de specifikatie testen door The Open Group, waar unix-like systems dat niet doen, ze lijken dus op UNIX systemen maar hebben niet het trademark.

b) Study the image above named UNIX timeline. Find out who Ken Thompson, Dennis Ritchie, Bill Joy, Richard Stallman, and Linus Torvalds are and what they have contributed to the development of UNIX or unix-like systems and to IT in general. TIP! English-language sources often contain more detailed information about these individuals.

Ken Thompson & Dennis Ritchie hebben UNIX gemaakt. Bill Joy heeft geholpen bij het maken van UNIX (BSD). Richard Stallman heeft GNU gemaakt, een geïnspireerde gratis versie van UNIX. En Linus Torvalds heeft Linux bedacht, een gratis kernel die ook geïnspireerd is van UNIX.

c) What is the philosophy of the GNU movement?

“Free software means that the software's users have freedom. (The issue is not about price.) We developed the GNU operating system so that users can have freedom in their computing.”

d) Does Ubuntu as a Linux operating system conform to the philosophy of the GNU movement? Please explain your answer.

Ja voor een deel, voor persoonlijk gebruik is het helemaal gratis echter niet voor commercieel gebruik. Het is echter wel volledig open source.

e) Find out what is the Windows Subsystem for Linux?

WSL is het Windows subsystem voor Linux.

f) Find out, which operating system family belongs to Android, iOS and ChromeOS?

Ze hebben alle 3 UNIX like operating systems, Android gebruikt Linux kernel als base

iOS gebruikt Apple omdat de basis Darwin een UNIX (BSD) achtergrond heeft.

ChromeOS gebruikt ook Linux kernel.

Assignment 5.2: Supercomputers and gameconsoles

- a) Research on this site what supercomputers are used for and write a short summary of it:
<https://www.computerhistory.org/timeline/search/?q=Supercomputer>

De eerste Linux supercomputer wordt gemaakt door David A. en wordt gebruikt als prototype voor het RoadRunner project om de eerste echte linux supercomputer voor open use te maken.

De ASCI Red wordt gebruikt om de US nuclear arsenal te onderhouden. De earth simulator is door de japanse overheid gemaakt om klimaat modellen van de wereld te maken. De intel paragon wordt gemaakt om atmosfeer en oceaan onderzoek te ondersteunen. De Deep Blue wordt gebruikt om Garry Kasparov te verslaan in een schaak tournement.

- b) IBM is a company that has already built a number of supercomputers. One of them is IBM's Roadrunner. The CPU developed for this supercomputer was further developed at a later stage as the CPU for the PlayStation 3 console. Find out what a **PlayStation 3 cluster** is and what it was used for? Een PlayStation 3 cluster zijn meerdere playstation 3's aan elkaar gelinked om op die manier een soort super computer te maken, je kan het gebruiken voor onderzoeken, ai image generation, en wordt vooral gebruikt als een goedkope oplossing voor super computers.
- c) You can build a supercomputer by putting a few computers together in a cluster. Here's what Oracle did with a collection of Raspberry Pi's, for example:
<https://blogs.oracle.com/developers/post/building-the-worlds-largest-raspberry-pi-cluster>
What specific operating system is running on this cluster?

Oracle Linux for ARM

- d) Does Oracle's Raspberry Pi supercomputer appear in the list of the 500 fastest supercomputers in the world? Make a logical decision for this, without going through the entire list.
<https://www.top500.org/lists/top500/list/2023/06/>
Nee want alleen de laagste op die lijst alleen al heeft meer dan 40.000 cores terwijl 1 raspberry pi tussen de 1 en 4 cores heeft 1050 pi's zouden dus tussen de 1050 en 5000 cores hebben wat nog lang niet bij de 40000 is.
- e) What CPU architecture is used for the PlayStation 5 and Xbox Series X?
What operating systems run on these consoles?
What conclusion can you draw from the answer to the previous question?

Beide AMD Zen 2 architecture

Playstation gebruikt Orbis OS, Xbox series X gebruikt een versie van microsoft windows

Dat de AMD Zen 2 blijkbaar heel goed is omdat ze die beide hebben maar dat de bedrijven toch graag zelf een operating system kiezen of maken.

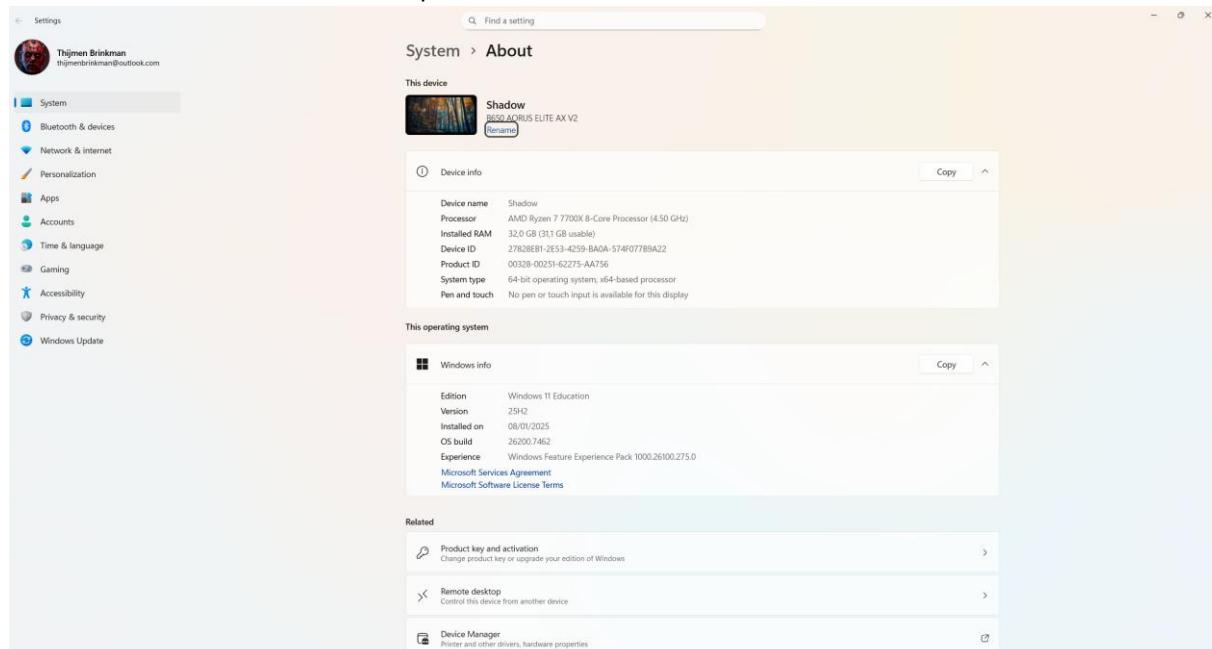

Assignment 5.3: Working with Windows

Take relevant screenshots of the assignments below

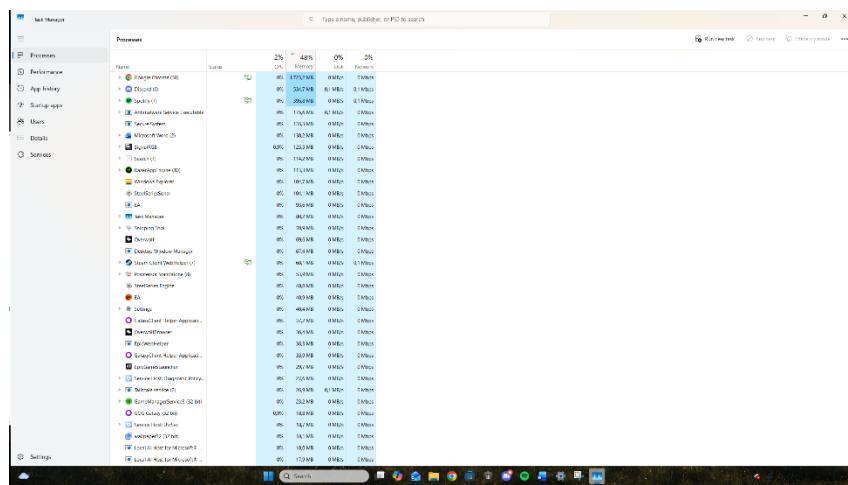

- Practice for about 10 minutes with the **Windows** keyboard shortcuts combinations, skip the general shortcuts in this exercise. Take a look at which screens are opened.
- The file explorer can be opened with **Windows + E**, Which key combination could you also use?

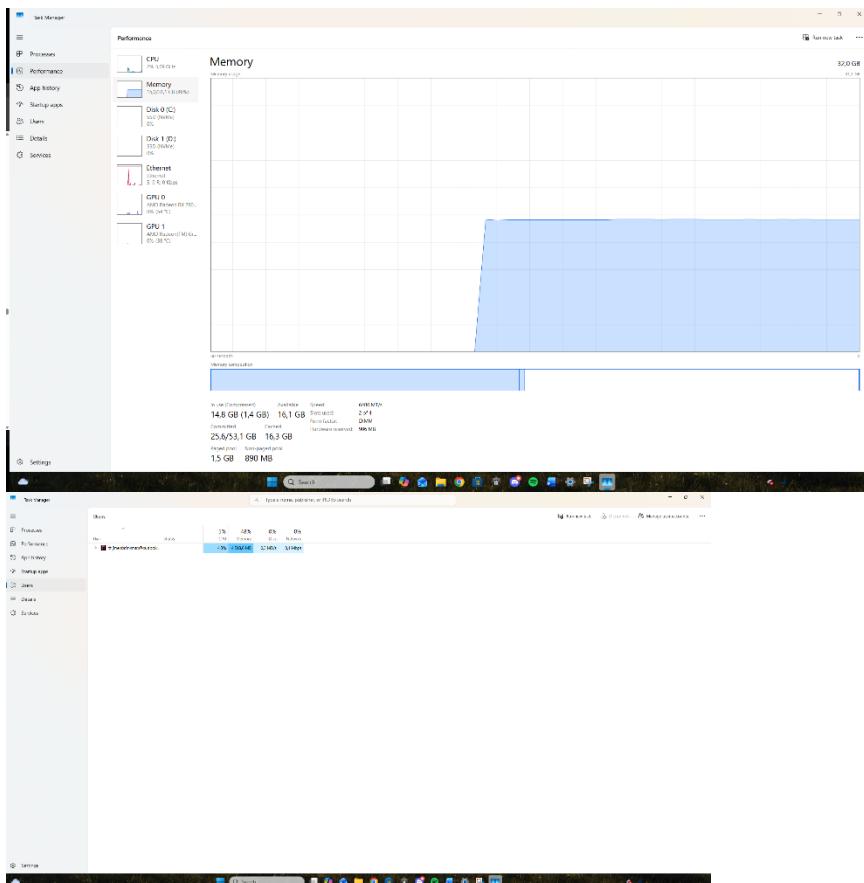

Windows toets + X daarna E

- Open the system properties with a **Windows** key combination, take a screenshot of the open screen. Paste this screenshot into this template.

- Open task manager with a key combination. Take screenshots of the tabs: processes (shows active processes), performance, and users. Place these three screenshots in this template.

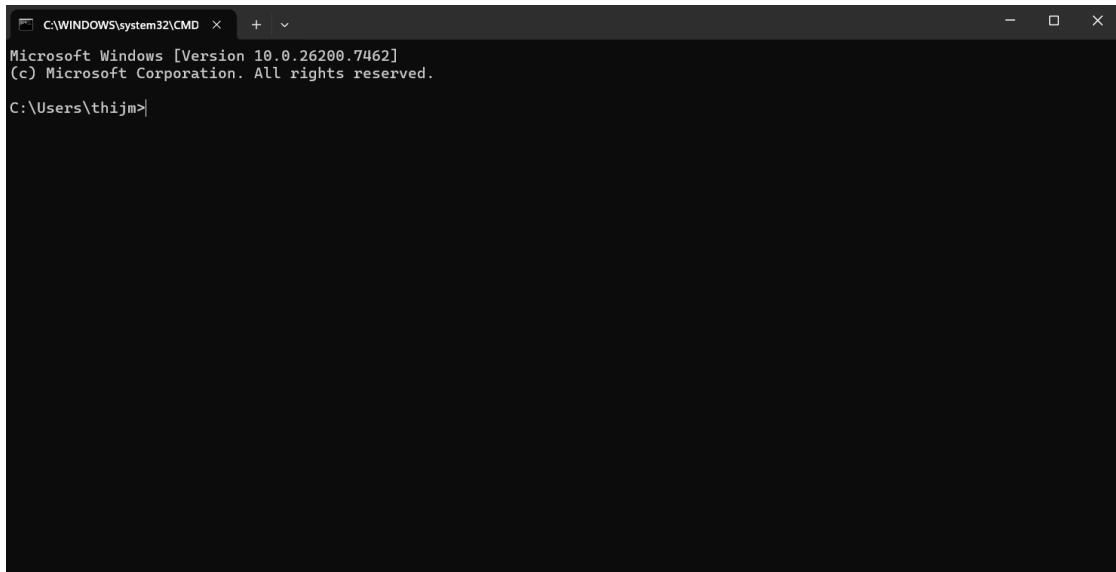

- h) If you're giving a PowerPoint presentation and you connect your laptop to a projector, Windows can use the projector as a second screen. For example, you may have Outlook open on your first screen that you don't show over the projector, while the PowerPoint presentation is displayed on the projector, or the second screen. Which key combination should you use for this?

Je zou eerst windows + tab kunnen doen om te kijken wat waar open staat, en als je dan tab ingedrukt houdt kan je door scrollen om te switchen.

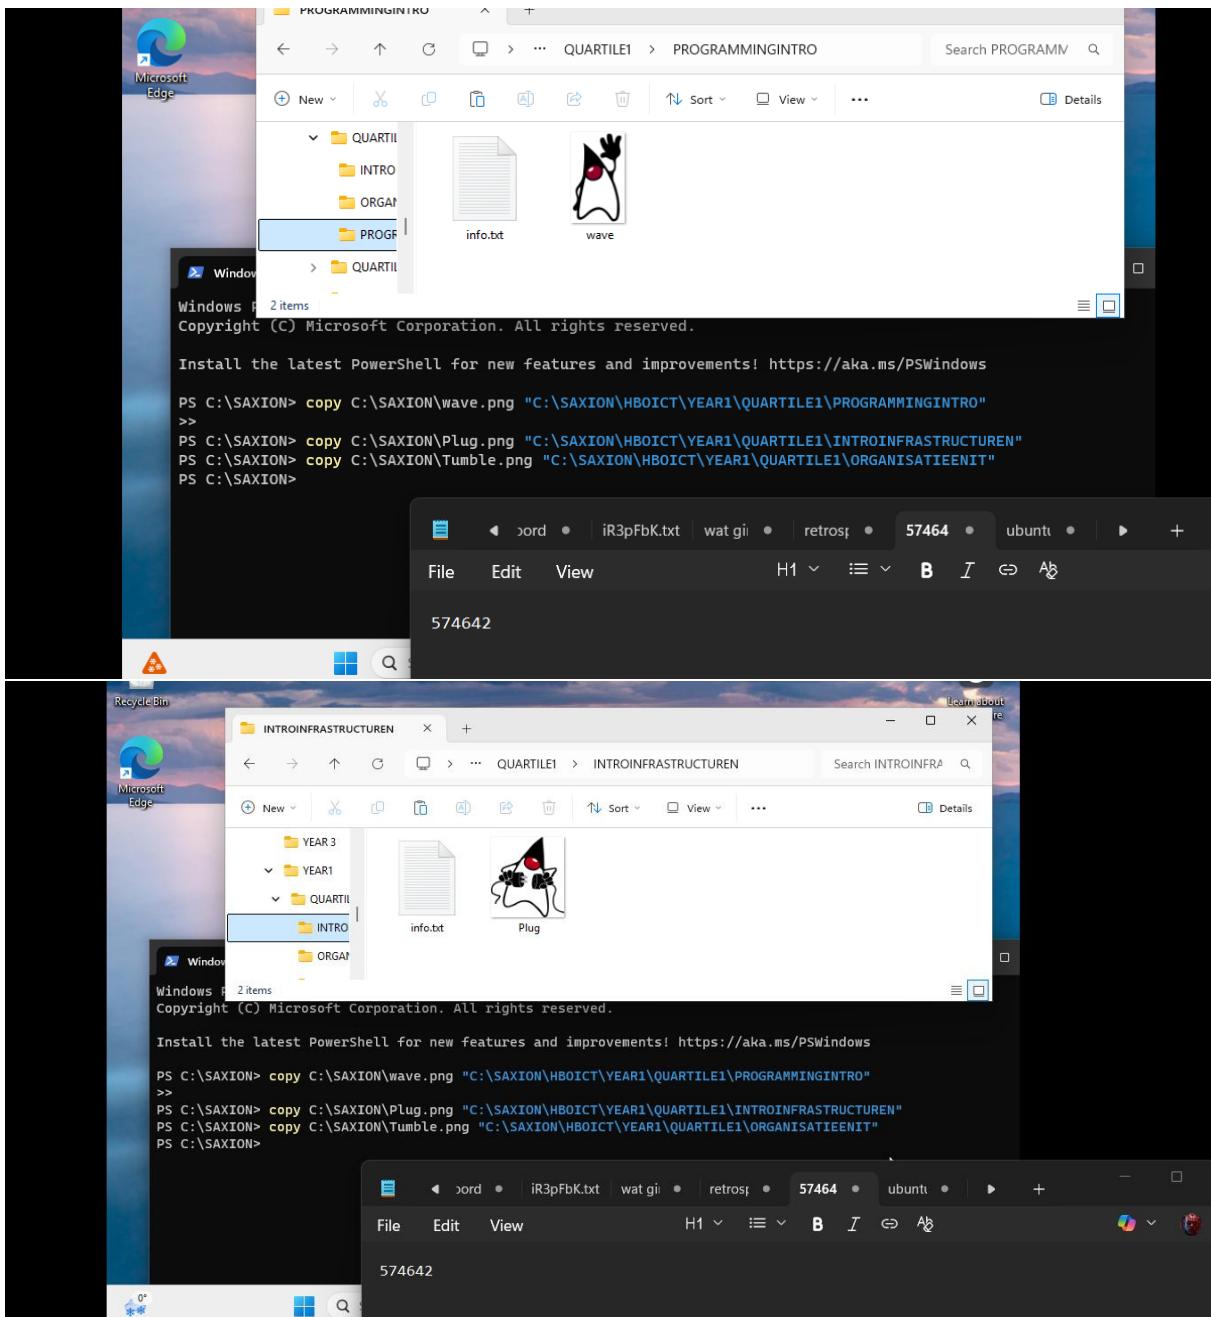

- i) If you leave the classroom for a while and you leave your laptop behind, it is wise to lock the screen. Your Apps will continue to run in the background. So, for example, if you're waiting for a download that takes a while, lock the screen and get a cup of coffee. Which key combination do you use for this? Windows + L
- j) Open the Run screen with a key combination. On this screen, type CMD and press <enter>. Take a screenshot of this result and paste it into this template.

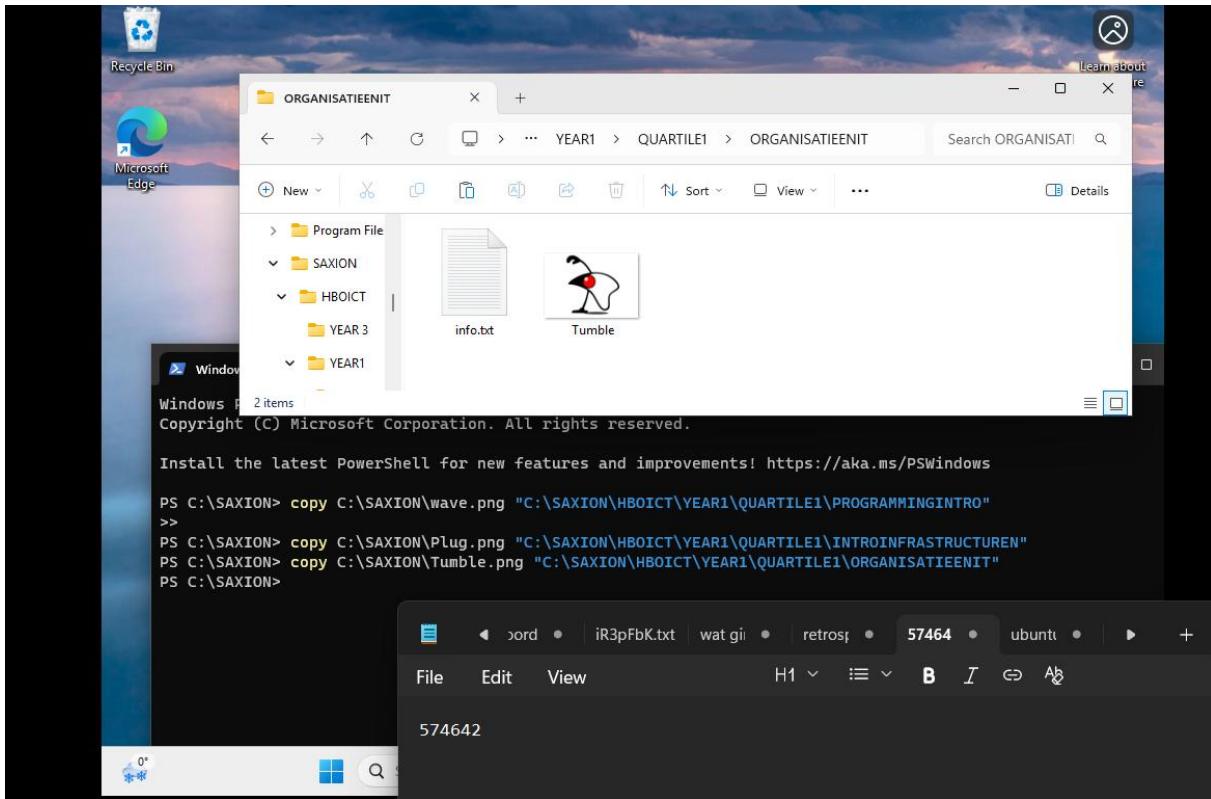

A screenshot of a Microsoft Windows Command Prompt window titled "C:\WINDOWS\system32\CMD". The window shows the standard Windows command-line interface with a black background and white text. At the top, it displays the path "C:\WINDOWS\system32\CMD" and the title bar text. Below the title bar, the text "Microsoft Windows [Version 10.0.26200.7462]" and "(c) Microsoft Corporation. All rights reserved." is visible. The command prompt itself shows the path "C:\Users\thijm>" followed by a blank line for input.

Working in the File Explorer

Relevant screenshots **copy** command:

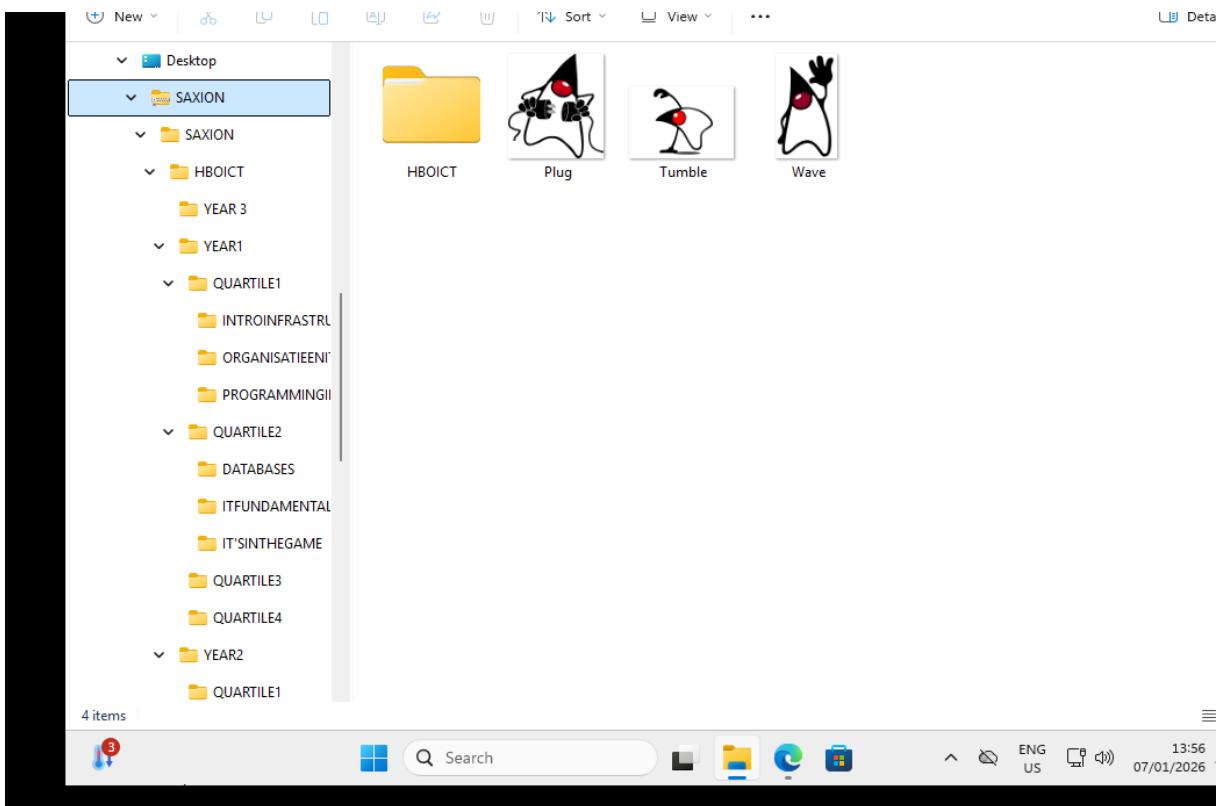

Relevant screenshots **tree** command:

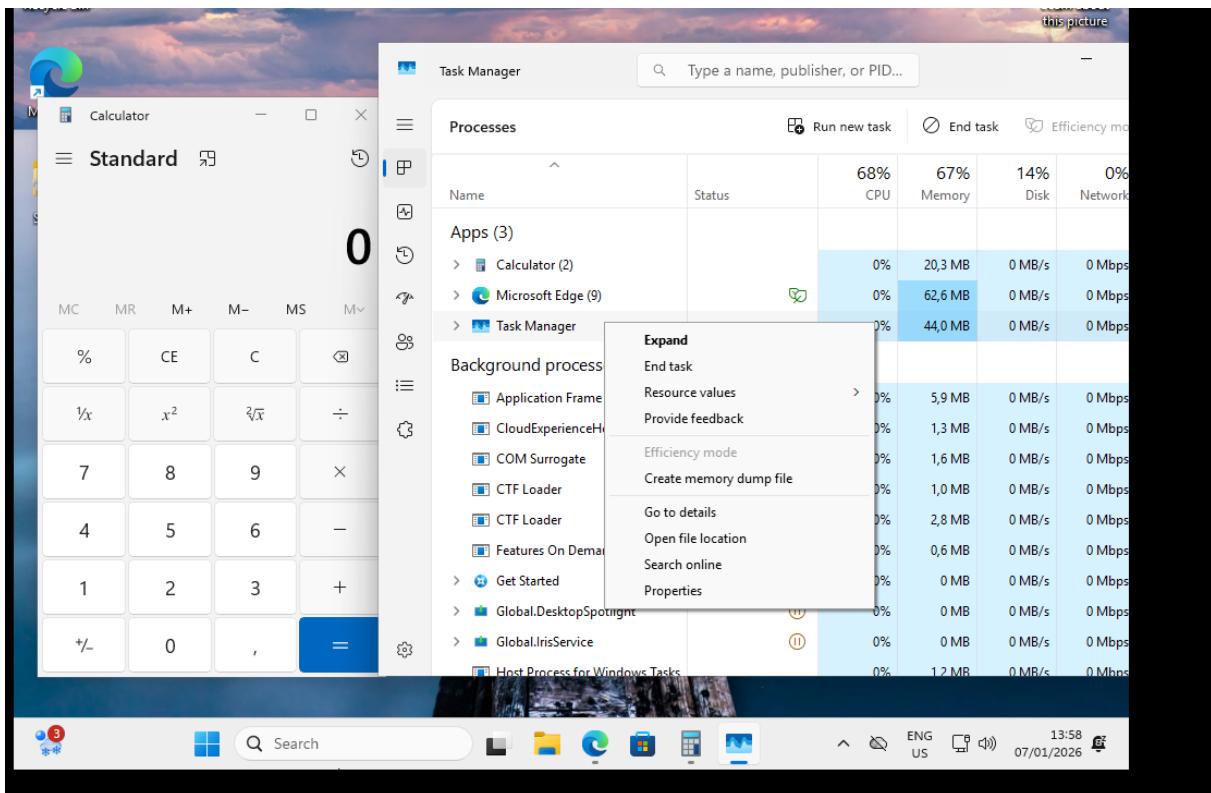

```
PS C:\SAXION> tree

Assignment 5.4: Working with Linux

Relevant screenshots + motivation

The image shows two identical terminal windows side-by-side. Both terminals have a dark background and light-colored text. In the top-left corner of each terminal, it says "thijmen@thijmen-VMware-Virtual-Platform:~\$". In the middle of each terminal, the command "cd /etc" is typed and then executed, resulting in the directory "/etc" being listed at the bottom of the screen. The terminal window has a vertical scroll bar on the left side.

```
thijmen@thijmen-VMware-Virtual-Platform:~$ cd /etc
thijmen@thijmen-VMware-Virtual-Platform:/etc$
```

```
thijmen@thijmen-VMware-Virtual-Platform:~$ cd /etc
thijmen@thijmen-VMware-Virtual-Platform:/etc$
```

Navigeren naar /etc folder in file explorer en terminal

How to get back to your home folder in the terminal?

Cd~

Name one significant difference in Linux's file structure when comparing it to Windows

Linux gebruikt een hoofddirectory / terwijl Windows meerdere kan gebruiken C:\ of D:\ bijvoorbeeld

What is the /etc directory usually used for?

Het is een map met bestanden voor de configuratie van systemen en applicaties

Which command in the terminal would you use to compress a text file into a tar archive?

```
tar -cvf bestand.tar testbestand.txt
```

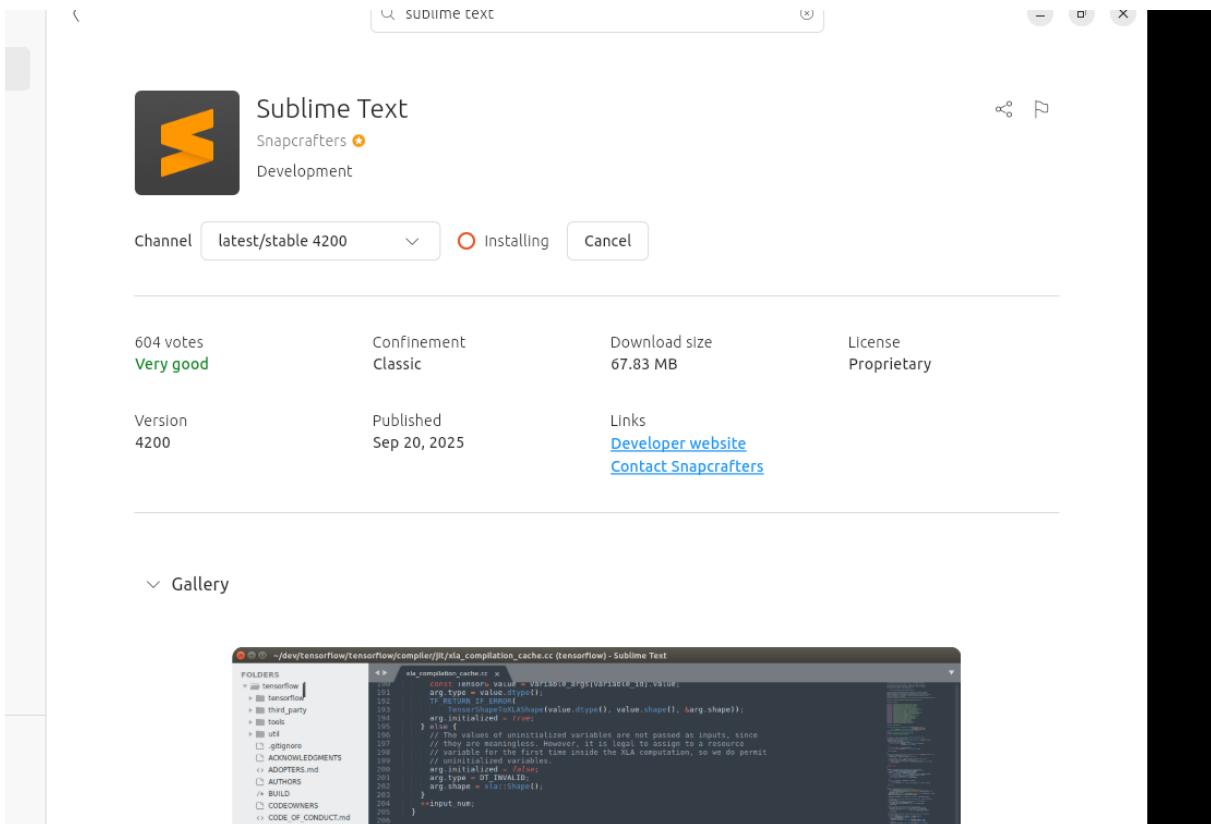

With which command in the terminal would you be able to extract a tar file?

Tar –xvf bestand.tar

Compress a text file in a tar archive and compress it with gzip.

```

Hier zie je dat neofetch is geïnstalleerd via de terminal, wat deze applicatie laat zien is bijvoorbeeld je OS versie, host, kernel versie, uptime enz,

Assignment 5.5: Users and permissions on Linux

Relevant screenshots + motivation

A screenshot of a terminal window titled "thijmen@thijmen-VMware-Virtual-Platform: ~/hello". The window contains the following command history:

```
thijmen@thijmen-VMware-Virtual-Platform:~/hello$ mkdir -p ~/hello
thijmen@thijmen-VMware-Virtual-Platform:~/hello$ nano ~/hello/hello.sh
thijmen@thijmen-VMware-Virtual-Platform:~/hello$ chmod +x ~/hello/hello.sh
thijmen@thijmen-VMware-Virtual-Platform:~/hello$ cd ~/hello
thijmen@thijmen-VMware-Virtual-Platform:~/hello$ ./hello.sh
Hello thijmen 574642!
thijmen@thijmen-VMware-Virtual-Platform:~/hello$ chmod 744 ~/hello/hello.sh
thijmen@thijmen-VMware-Virtual-Platform:~/hello$ ls -l ~/hello/hello.sh
-rwxr--r-- 1 thijmen thijmen 39 Jan  8 11:43 /home/thijmen/hello/hello.sh
thijmen@thijmen-VMware-Virtual-Platform:~/hello$
```

Hierboven alle gebruikte commands

Assignment 5.6: View the contents of files

Relevant screenshots + motivation

What does each of these commands do? Write it out for yourself.

Cat: Laat de inhoud van een bestand zien

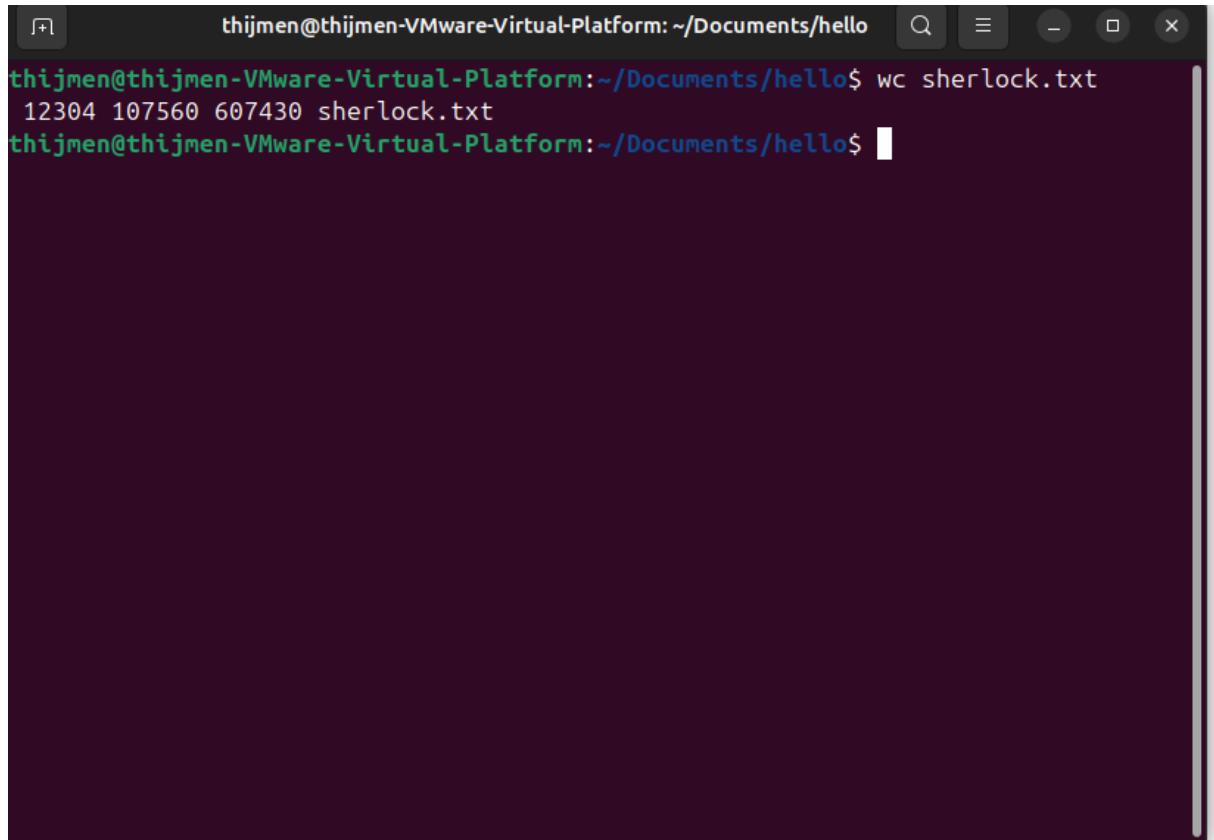

Wc: daarmee kan je het aantal woorden, regels en karakters van een bestand laten zien

Less: laat de inhoud van een bestand per pagina zien

Tail: Toont de laatste regels van een bestand

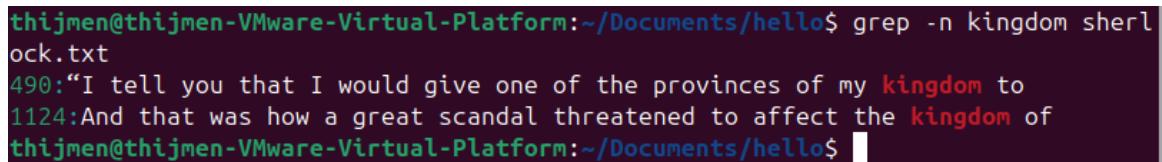

Head: toont de eerste regel van een bestand

Grep: zoekt naar bepaalde woorden in een bestand en laat ook de regels zien waar de woorden voorkomen.

```
thijmen@thijmen-VMware-Virtual-Platform:~/Documents/hello$ wc sherlock.txt
12304 107560 607430 sherlock.txt
thijmen@thijmen-VMware-Virtual-Platform:~/Documents/hello$
```

Hier zie je het aantal regels woorden en karakters

```
thijmen@thijmen-VMware-Virtual-Platform:~/Documents/hello$ grep -n kingdom sherlock.txt
490:"I tell you that I would give one of the provinces of my kingdom to
1124:And that was how a great scandal threatened to affect the kingdom of
thijmen@thijmen-VMware-Virtual-Platform:~/Documents/hello$
```

Hier zie je hoevaak en waar het woord kingdom voorkomt

```

thijmen@thijmen-VMware-Virtual-Platform:~/Documents/hello$ head -n 500 sherlock.
txt | tail -n 20

"Pray do so. I shall be all anxiety."
"Then, as to money?"
"You have _carte blanche_."
"Absolutely?"
"I tell you that I would give one of the provinces of my kingdom to
have that photograph."
"And for present expenses?"
The King took a heavy chamois leather bag from under his cloak and laid
it on the table.
"There are three hundred pounds in gold and seven hundred in notes," he
said.

thijmen@thijmen-VMware-Virtual-Platform:~/Documents/hello$
```

Hier zie je de 10 regels boven het woord kingdom
